Based in India · Remote full-stack roles

PROFILE

Full-stack engineer with **5+ years** across enterprise applications and an independent healthcare SaaS venture. Build React/TypeScript interfaces, Node.js/NestJS APIs and PostgreSQL workflows end to end, with an emphasis on clear contracts, scoped access and recoverable processing.

PROFESSIONAL EXPERIENCE

Docita - Healthcare SaaS (docita.work) | Hyderabad, India

Full Stack Engineer (Independent SaaS venture) | Aug 2025 – Present

- Design and build a **multi-tenant healthcare SaaS** across React/Vite interfaces, NestJS APIs and PostgreSQL workflows for scheduling, patient records, prescriptions, billing and inventory.
- Implement clinical forms using **React Hook Form, Zod and TanStack Query**, with clinic-timezone conversion, pending/error states and server-state refresh after successful writes.
- Develop clinic-scoped **NestJS, Prisma and PostgreSQL** APIs and resource policies; add configurable Row-Level Security, patient-field encryption and sensitive-data audit hooks.
- Implement **PostgreSQL-backed jobs** with bounded retries, claim fencing and manual dead-letter replay; integrate HMAC-verified payment webhooks, transactional invoice updates and outbox events for selected workflows.
- Build an **internal operational dashboard** for API latency, error rates, telemetry gaps and queue outcomes; maintain Jest, Vitest and Playwright checks for API, worker and frontend changes.

MAQ Software | Hyderabad, India

Senior Software Engineer | Mar 2025 – Jul 2025

Software Engineer | Oct 2021 – Feb 2025

- Built recruitment and internal-workflow applications with **TypeScript, React and Node.js**; centralized shared service logic and input validation across modules.
- Profiled **REST APIs and PostgreSQL queries**; addressed query bottlenecks with indexing, pagination, targeted caching and N+1 removal.
- Built reusable React and TypeScript components for responsive interfaces, standardizing loading, validation and error states with keyboard and screen-reader support.
- Improved delivery practices with **GitHub Actions, Jest and release checks**; mentored engineers through code reviews, debugging and design discussions.

Cognizant | Hyderabad, India

Programmer Analyst Trainee | Feb 2021 – Oct 2021

- Built and integrated **4 Spring Boot services** for product, vendor and checkout workflows in an e-commerce training platform during a graduate associate programme.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Vite, TanStack Query, React Hook Form, Zod, Tailwind CSS, accessibility; Next.js (working depth)

Backend & Data: Node.js, NestJS, Express, REST/OpenAPI, WebSockets, SQL, PostgreSQL, Prisma, schema design, indexing, transactions

Architecture & Security: System Design, multi-tenant SaaS, ABAC, Row-Level Security, JWT, transactional outbox, idempotency, retries/DLQ, HMAC webhooks

Testing & Delivery: Jest, Vitest, Playwright, React Testing Library, Git, GitHub Actions, CI/CD, Docker, AWS RDS, Fly.io, Cloudflare Workers/R2, Turborepo, pnpm

EDUCATION & LANGUAGES

B.Tech, Computer Science and Engineering | K L University, India | 2021 | CGPA 8.67/10

Languages: English (professional working proficiency)
