

Vamsi Krishna Chandaluri

Senior Full Stack Engineer | TypeScript | React | Node.js | NestJS | PostgreSQL

Hyderabad, India | cvamsik99@gmail.com

linkedin.com/in/vamsikrishnachandaluri | github.com/CVamsi27 | [Portfolio](#)

PROFILE

Senior Full Stack Engineer with **5+ years of software development experience** across enterprise applications and healthcare SaaS. Deliver end-to-end product workflows with TypeScript, React, Node.js and PostgreSQL, covering API design, tenant isolation, reliable background processing and releases.

PROFESSIONAL EXPERIENCE

Docita - Healthcare SaaS | Hyderabad, India

Full Stack Engineer | Aug 2025 – Present

- Own end-to-end development across **5 core workflows** in a multi-tenant healthcare SaaS: scheduling, patient records, prescriptions, billing and inventory, delivered through a TypeScript monorepo.
- Build **React/Vite** clinical forms and server-state updates with TanStack Query, React Hook Form and shared Zod contracts, handling validation, pending submissions and API errors.
- Develop **NestJS, Prisma and PostgreSQL** APIs with tenant-scoped authorization, resource-level access policies and transactional writes; implement Row-Level Security policies, field encryption and sensitive-data audit logging.
- Implement **PostgreSQL-backed background jobs and a transactional outbox** with bounded retries and dead-letter replay; integrate HMAC-verified payment webhooks and asynchronous document workflows.
- Validated appointment-list indexing on **78,000 generated records across 25 simulated clinics**: the existing composite index returned 20 rows without sorting versus a 3,120-row scan and sort in a local PostgreSQL benchmark.
- Built an **internal operational dashboard** for clinic activity, API latency percentiles and error rates; maintain Jest/Vitest/Playwright checks and deliver API, worker and frontend releases with Docker, Fly.io, AWS RDS and Cloudflare.

MAQ Software | Hyderabad, India

Senior Software Engineer / Software Engineer | Oct 2021 – Jul 2025

- Developed recruitment and internal-workflow applications with **TypeScript, React and Node.js**; centralized shared service logic and input validation across application modules.
- Profiled **REST APIs and PostgreSQL queries**; addressed query bottlenecks with indexing, pagination, targeted caching and removal of N+1 access patterns.
- Built reusable React and TypeScript components for responsive interfaces, standardizing loading, validation and error states with keyboard and screen-reader support.
- Improved delivery practices with **GitHub Actions, Jest and release checks**; mentored engineers through code reviews, debugging and design discussions.

Cognizant | Hyderabad, India

Programmer Analyst Trainee | Feb 2021 – Oct 2021

- Built and integrated 4 Spring Boot microservices (Eureka service discovery, Zuul gateway, JWT auth, JPA/JDBC persistence) for an e-commerce platform's product, vendor, and checkout workflows during a structured graduate associate program.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Vite, TanStack Query, React Hook Form, Zod, Tailwind CSS, accessibility; Next.js (working depth)

Backend & Data: Node.js, NestJS, Express, REST/OpenAPI, WebSockets, SQL, PostgreSQL, Prisma, schema design, indexing, transactions

Architecture & Security: multi-tenant SaaS, ABAC, Row-Level Security, JWT, transactional outbox, idempotency, retries/DLQ, HMAC webhooks

Testing & Delivery: Jest, Vitest, Playwright, React Testing Library, Git, GitHub Actions, CI/CD, Docker, AWS RDS, Fly.io, Cloudflare Workers/R2, Turborepo, pnpm

EDUCATION & LANGUAGES

B.Tech, Computer Science and Engineering | K L University, India | 2021 | CGPA 8.67/10

Languages: English (professional working proficiency)
