PROFILE

Full Stack Engineer with **5+ years** delivering business-critical SaaS features end to end with React, TypeScript, Node.js, NestJS, and PostgreSQL. I translate complex operational needs into useful product flows, well-designed APIs, maintainable data models, and dependable releases. Currently building multi-tenant healthcare workflows for **25+ clinics** and **1,000+ appointment workflows per month**.

PROFESSIONAL EXPERIENCE

Docita - Healthcare SaaS | Hyderabad, India

Full Stack Engineer | Aug 2025 - Present

- Own end-to-end delivery of a multi-tenant healthcare platform serving **25+ clinics** and **1,000+ appointment workflows per month**, translating scheduling, records, prescriptions, billing, and inventory needs into released product workflows.
- Design maintainable NestJS, Prisma, and PostgreSQL APIs and data models using tenant-scoped queries, migrations, indexes, pagination, and transactional writes.
- Make sensitive clinical workflows trustworthy through request-scoped tenancy, PostgreSQL Row-Level Security, deny-by-default ABAC, encryption, audit trails, and PHI-safe error handling.
- Engineer resilient notifications, documents, payments, and partner integrations with PostgreSQL queues, transactional outbox, idempotency, retries, dead-letter replay, advisory locks, and verified webhooks.
- Build accessible React/Vite product experiences with TanStack Query and shared Zod schemas; enforce release confidence with Jest, Vitest, Playwright, GitHub Actions, Docker, and database snapshots.
- Ship controlled AI-assisted capabilities with validated outputs, usage quotas, timeouts, and environment-aware controls.

MAQ Software | Hyderabad, India

Senior Software Engineer / Software Engineer | Oct 2021 - Jul 2025

- Reduced delivery time for recruitment and internal-workflow modules by **25%** through shared TypeScript service patterns, input validation, pagination, and clear module boundaries.
- Cut REST API p95 latency by **30%** across Node.js, Express, NestJS, and PostgreSQL services by profiling slow paths, tuning queries and indexes, adding targeted caching, and removing N+1 access patterns.
- Built a reusable React and TypeScript component library that reduced duplicated UI and made loading, validation, keyboard, and screen-reader behavior more consistent.
- Improved release quality with GitHub Actions, Jest, release checks, and code review while sustaining **85%+ test coverage**; mentored four engineers through design reviews and pairing.

Cognizant | Hyderabad, India

Programmer Analyst Trainee | Feb 2021 - Oct 2021

- Built **4 Spring Boot microservices** for product, vendor, retail-shop, and checkout workflows in an e-commerce platform.
 - Implemented Eureka service discovery, Zuul gateway routing, JWT authorization, REST APIs, Swagger/OpenAPI documentation, and JPA/JDBC persistence.
-

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Java, Python (working knowledge)

Frontend: React, Vite, Next.js (working depth), Tailwind CSS, TanStack Query, React Hook Form, Zod, accessibility, Web Vitals

Backend & Data: Node.js, NestJS, Express, REST/OpenAPI, WebSockets, PostgreSQL, Prisma, schema design, indexing, transactions, migrations

Security & Reliability: multi-tenant SaaS, Row-Level Security, ABAC, JWT, transactional outbox, idempotency, retries/DLQ, HMAC webhooks, encryption, audit logging

Quality & Delivery: Jest, Vitest, Playwright, React Testing Library, GitHub Actions, Docker, AWS RDS, Fly.io, Cloudflare Workers/R2, Turborepo, pnpm

EDUCATION & LANGUAGES

B.Tech, Computer Science and Engineering | K L University, India | 2021 | CGPA 8.67/10

Languages: English (professional working proficiency)
