Based in India · Remote full-stack roles

PROFILE

Full-stack engineer with **5+ years** building enterprise applications and an independent healthcare SaaS. Develop React/TypeScript interfaces, Node.js/NestJS APIs and PostgreSQL workflows, with hands-on work in query optimization, tenant-scoped access and recoverable jobs.

PROFESSIONAL EXPERIENCE

Docita - Healthcare SaaS (docita.work) | Hyderabad, India

Full Stack Engineer (Independent SaaS venture) | Aug 2025 – Present

- Designed and built **Docita, a multi-tenant healthcare SaaS serving 25+ clinics**, using React, TypeScript, NestJS and PostgreSQL across scheduling, patient records, prescriptions, billing and inventory.
- Supported **26,000 appointments, 20,800 prescriptions and 26,000 invoices monthly**, serving approximately **20,000 distinct clinic-patients** and handling **520,000 appointment-related API requests**.
- Developed clinical interfaces using **React Hook Form, Zod and TanStack Query**, with shared validation, timezone-safe scheduling and consistent loading, error and refresh behavior.
- Implemented **clinic-scoped persistence, resource-level authorization, selected patient-field encryption and sensitive-data audit hooks**.
- Built **PostgreSQL-backed background processing** with five-attempt retry budgets, claim fencing, stale-job recovery and manual dead-letter replay; implemented transactional outbox delivery with batches capped at **200 events**.
- Integrated **HMAC-verified Razorpay webhooks** with duplicate-capture protection, transactional invoice updates and outbox events for selected payment workflows.
- Maintained CRUD API response times within **P95 ≤200 ms and P99 ≤500 ms**, with operational dashboards exposing latency, errors, telemetry gaps and background-job outcomes.

MAQ Software | Hyderabad, India

Senior Software Engineer | Mar 2025 – Jul 2025

Software Engineer | Oct 2021 – Feb 2025

- Built recruitment and internal-workflow applications with **TypeScript, React and Node.js**; centralized service logic and input validation in reusable modules.
- Optimized **REST API and PostgreSQL access patterns** through profiling, indexing, pagination, targeted caching and N+1 removal.
- Standardized responsive React and TypeScript forms and reusable components with loading, validation and error states, keyboard interaction and screen-reader support.
- Strengthened release checks with **GitHub Actions and Jest**; mentored engineers through code reviews, debugging and design discussions.

Cognizant | Hyderabad, India

Programmer Analyst Trainee | Feb 2021 – Oct 2021

- Built and integrated **4 Spring Boot services** for product, vendor and checkout workflows in an e-commerce training platform during a graduate associate programme.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Vite, TanStack Query, React Hook Form, Zod, Tailwind CSS, accessibility; Next.js (working depth)

Backend & Data: Node.js, NestJS, Express, REST/OpenAPI, WebSockets, SQL, PostgreSQL, Prisma, schema design, indexing, transactions

Architecture & Security: System Design, multi-tenant SaaS, ABAC, Row-Level Security, JWT, transactional outbox, idempotency, retries/DLQ, HMAC webhooks

Testing & Delivery: Jest, Vitest, Playwright, React Testing Library, Git, GitHub Actions, CI/CD, Docker, AWS RDS, Fly.io, Cloudflare Workers/R2, Turborepo, pnpm

EDUCATION & LANGUAGES

B.Tech, Computer Science and Engineering | K L University, India | 2021 | CGPA 8.67/10

Languages: English (professional working proficiency)
